— FILTER TYPES

The correct filter, any time, every time.

For years, Nobel has been a **market leader** in a wide range of filtration types.

With **long-term partnerships** across multiple brands and a well-stocked inventory, Nobel is able to supply a wide range of filter types at short notice and under **favorable conditions**.

Hydraulic filters

Protect systems from wear and extend the lifespan of machines.

Lubrication filters

Ensure long-term protection of moving components and extend oil change intervals.

Air filters

Protect combustion engines and compressors against harmful particles.

Fuel filters

Remove water, dirt, and other contaminants to ensure trouble-free engine operations.

Water filters

Suitable for drinking water, process water, and industrial applications.

CCV filters

Capture oil fumes and reduce emissions in crankcase ventilation systems.

Coolant filters

Maintain clean cooling systems to prevent overheating and protect against corrosion.

Breather filters

Protect (fuel) tanks and hydraulic systems from external moisture and dust.

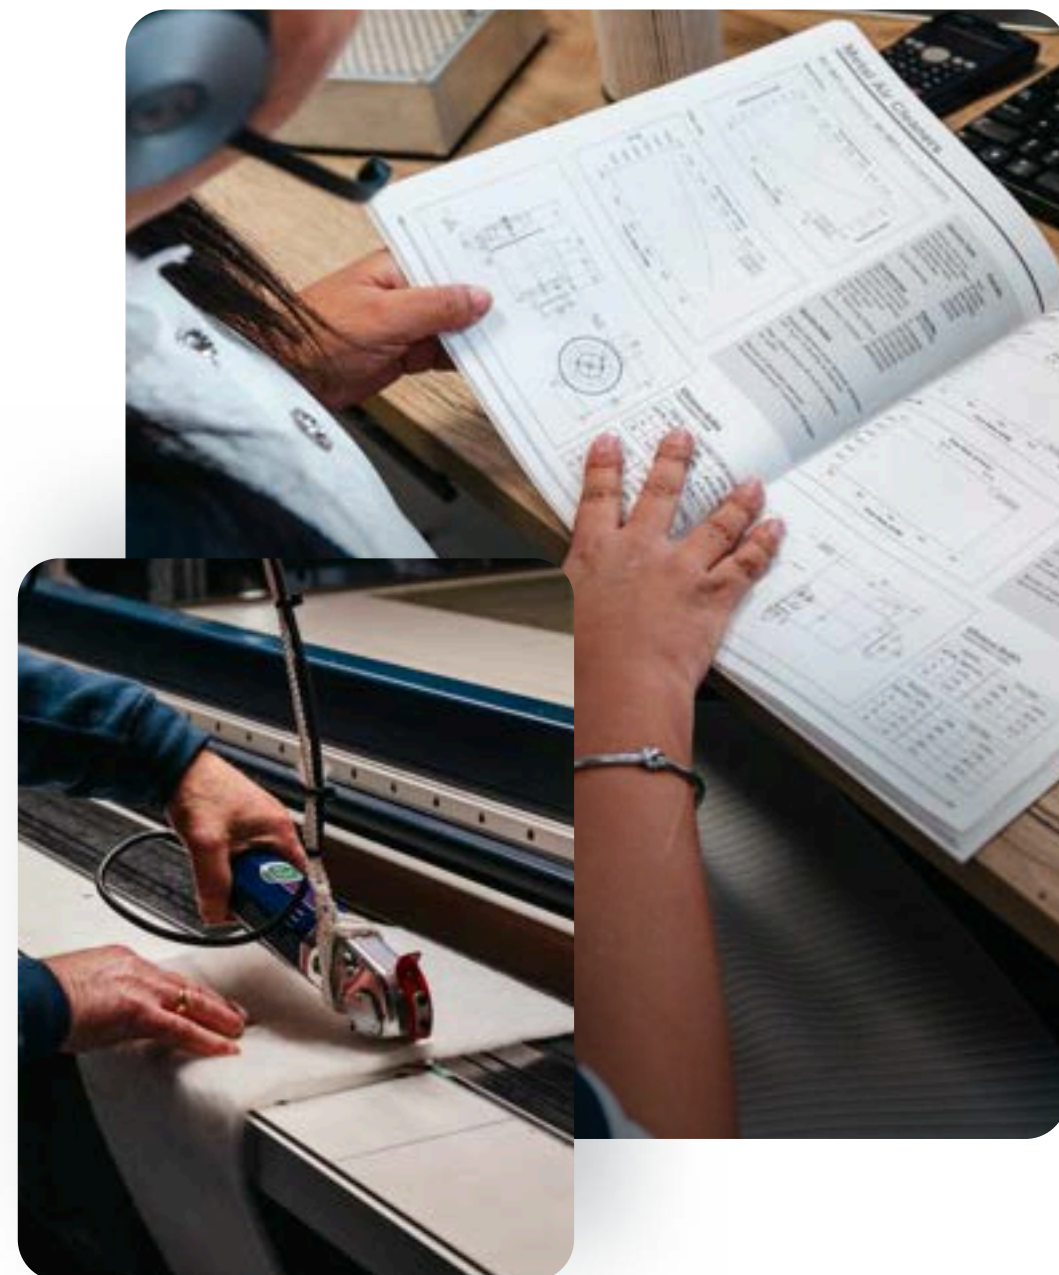

i Nobel supplies directly from in-house stock, ensuring short delivery times.

Same-day shipping is often possible. Night-time deliveries & urgent transport can be arranged upon request.

— CUSTOMIZED SOLUTIONS

Customization that truly works.

Beyond its extensive selection of filter types, Nobel delivers **customized filtration solutions** engineered to suit your unique operational requirements.

Assembly of complete cleaning filtration units

Designed to minimize oil waste and enable 100% circular reuse of the used oil.

Refurbished cleaning filtration units

Reconditioned filtration units available in various sizes for different contamination issues.

Digital filtration schemes

Nobel's experts create clear filter schemes for better insight and easier ordering.

Customized filter mats

Intended to extend filter lifespan. Customized to specific needs of various sizes of filter units.

Dedicated inspection

A dedicated inspection room for in-depth analysis of bacterial contamination in fuels and filter cartridges.
