order-no. 104123

MC-23 XXL REFILL
Filter efficiency: 5-20 µm
Filter surface: >2300 cm²

In the course of sustainability and resource gentle, we have our metal large-capacity filter MC-23 reissued.

The new **opticlean 2.0 REFILL** filter element with the identical and proven properties, such as filter fineness and filter area, are fully retained.

The metal filter cup meets the special requirements in engine rooms and only needs to be converted once. The new inexpensive refill filter elements **MC-23 XXL** with sealing ring are replaced after use and service life and are 100% incinerable after professional disposal (waste oil bin).
